Successful EVMS implementation depends on program personnel following the company's program management policies and procedures and utilizing the company's program management tools and systems in a manner compliant with the company's EVM System Description and the ANSI EVMS standard. As a Project Management Institute (PMI) Registered Education Provider (REP), Charter Performance is an experienced training courseware developer. We develop and deliver EVMS training courseware that integrates our client's program management policies, procedures, guidelines and templates with guidance and expectations of the ANSI EVMS standard.
