

“After several false starts on implementing an EVMS system over several years, I’m extremely happy that I found Charter Performance. Kelly and Candi were able to structure a phased implementation plan that the Kollsman Management Team could understand and it provided the step-by-step sequence that made the entire process easier to understand with a much higher probability of success. Now we’re well on our way and Charter Performance is always right next to us with excellent guidance and all the details we need to be successful.” -- David Enos, Director, Thermal Imaging and Night Vision Products

“As a company with little EVMS experience or contracts prior to the contract requiring EVMS reporting, Amtec Corporation found Charter Performance to be knowledgeable and responsive in helping us craft a solution to a contractual requirement for EVMS. Additionally, we utilized Charter Performance services in bidding on a contract with full ANSI-compliant EVMS and found their support for this proposal effort to be outstanding in the quality of the written materials and graphics and timely for the RED Team and GOLD Team reviews that we asked them to support.” -- Gary Grant, Program Manager

"I want to take an opportunity to thank both of you for all of your hard work and guidance in our EVMS Implementation effort. Your approach to tailor our implementation to our current business structure and the time you spent interviewing all of the contributors has been key to developing good, workable processes. I am continuously impressed with the depth of your knowledge and the common sense methods you employ. I am equally impressed with your ability to translate EVMS concepts to a diverse audience where some already have preconceived opinions and others have no experience at all with EVMS. I sincerely appreciate your efforts and look forward to working with you on this and other endeavors." -- Paul Martin, Director, Finance and Pricing

"Charter Performance has been a wonderful organization to work with. We have engaged Charter over the past year or so to help us with training, workshops, and also proposal support. Their products and services are always top notch and always delivered with professionalism and courtesy. We have found Charter Performance to be extremely easy to work with, reliable, flexible, and dedicated to quality service and products. I would not hesitate to engage Charter for any future efforts and am very happy to be able to provide this reference." -- Keith Zook, PMP, VP Engineering Services

"I attended one of Charter Performance Management's EVMS training courses several years ago and was so impressed that I recommended their training program to several of my business associates who attended their classes and later thanked me for it. Charter's training program very professional and the instructors were very knowledgeable of the subject matter and explained the processes very clearly and completely. In fact, I was so impressed with Charter that I later recommended them to consult with a prime contractor I worked with that was struggling to set up an acceptable EVM system. That contractor was very pleased with the training and advice they received and it was clear to me that Charter made a tremendous positive impact on the contractor's understanding of EVM processes and how to setup an acceptable

system." -- John Puett, PMP, Sr. Program Control Analyst

“Charter Performance’s in depth knowledge and understanding of every aspect of Earned Value Management has enabled us to implement a program compliant EVMS system on a uniquely structured SHARP contract.” -- Jeff Dame, Deputy Program Manager
